

# HOMELAND VINYL PROFILES

## ITEM KEY EXPLANATION

### COLOR CODES

**W** - White  
**T** - Tan

**Y** - Honey Maple  
**O** - Mocha Walnut

**D** - Adobe  
**U** - Green Teak

**Q** - Earl Gray

*(See next page for Gray and Beige ordering guidelines)*

### INVENTORY CODES

**F54U**  
Profile  
Code

**W**  
Color  
Code

**064**  
Length  
in Inches

**346**  
Pieces  
per Bundle

*Refer to profile sheet to obtain the profile code for the product you are ordering.  
Always review your order confirmation with descriptions to ensure order accuracy.*

*When ordering a length that is fractional, use  
the following list to determine the proper code for the length you require.*

*1/4" - A  
3/8" - E*

*1/2" - B  
5/8" - F*

*3/4" - C  
7/8" - G*

*1/8" - D  
11/16" - H*

*Example: 64-1/2" would be 64B*

## MADE TO ORDER "MTO" PROGRAM

*Any profiles that are indicated as "Made To Order" in our profile sheets are not standard items and will only be produced as can be reasonably accommodated. Additionally, requests for non-standard lengths or special colors must be submitted through the "Made to Order" (MTO) program.*

*Contact your Homeland representative for information on the MTO program. MTO item requests must be submitted in writing via e-mail or fax. Not all requests can be accommodated.*

*Customer Account must be in good standing and current before MTO requests will be considered. Special Terms and Conditions of Sale will apply. Consult your Homeland representative for details. MTO requests are not accepted until approved and confirmed in writing. Once confirmed, the order cannot be cancelled by customer.*

*Minimum purchase quantity required of the same profile and color for all MTO items. Usually at least 6 bundles are required. See the attached profile sheets or contact your Homeland representative for additional details.*

*Lead-times for "Made To Order" items cannot be estimated until requests have been approved and confirmed. Due to the infrequent running of MTO items, and depending on the item, it may be a number of weeks before an answer on an MTO request can be given. Typically, an estimated lead-time for production can be established within 8-10 days once a request is approved and scheduled for production. "Made To Order" items may only be produced 2 or 3 times a year or less. Please plan ahead and make any MTO requests as early as possible to take advantage of each production run on MTO profiles.*

*Special terms and conditions apply to all MTO requests accepted as orders. Orders must ship complete once ready, leaving no backorders. Your Homeland Representative will try to accommodate reasonable requests, but completed MTO orders may be invoiced and shipped at the discretion of Homeland and will not be held.*

# GRAY & BEIGE ORDERING GUIDELINES

**Gray & Beige will not be offered in 2017. No orders for gray & beige will be accepted after October 1, 2016. All orders fall under the "Made To Order" Program and must ship complete once produced.**

**Please request freight cost prior to placing orders from facilities you do not typically ship from.**

## **Grey Profiles/Lengths produced in Millville, NJ facility ONLY:**

*F10E - 5" x 5" post .135 wall (9')*  
*F12N - 4" x 4" post .135 wall (16')*  
*F3P2 - 2" x 7" Nexus Pocket rail (94")*  
*F37C - 1-3/4" x 5-1/2" Gorilla Pocket Rail (94")*  
*F22C - 2" x 6" Ribbed Rail - TBD*  
*F24E - 2" x 3-1/2" .095 wall (16')*  
*F54U - 7/8 x 6 Utility T&G (16')*  
*F57C - 7/8" x 3 Standard picket (16')*  
*F42S - 1-1/2" x 1-1/2" Standard picket (16')*  
*F27E - 1-1/2" x 5-1/2" Ribbed Utility (16')*  
*F83S - 7/8" U-Channel (10'2")*

## **Beige Profiles/Lengths produced in Ogden, UT facility ONLY:**

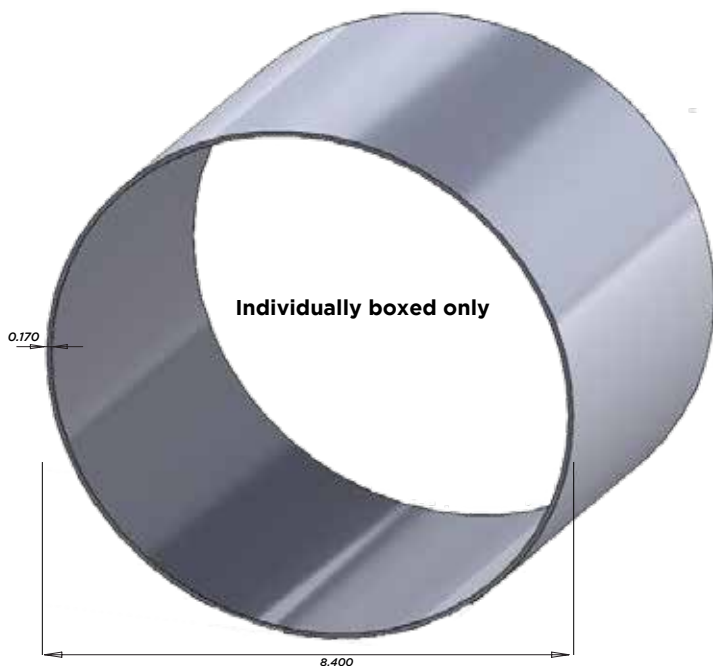

*F10C - 5" x 5" post .150 wall (16')*  
*F12N - 4" x 4" post .135 wall (16')*  
*F31S - 2" x 7" Railmaster Pocket rail (16')*  
*F22E - 2" x 6" Hollow Rail (16')*  
*F24C - 2" x 3-1/2" 120 wall (16')*  
*F52U - 1" x 6" Utility T&G (16')*  
*F43C - 1 3/8" x 1 3/8" Standard picket (16')*  
*F82S - 1" U-Channel (10'2")*

# FABRICATION GUIDELINES

**Homeland Vinyl Products does not warranty bowing of pickets. Please make sure of proper installation to reduce all of the factors mentioned.**

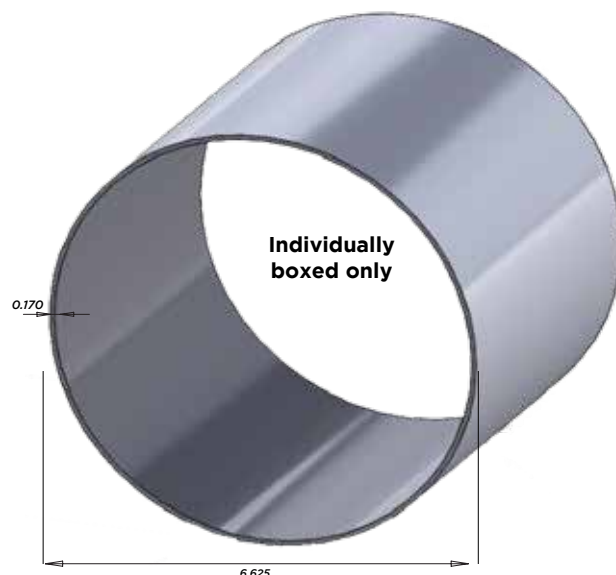

- *Follow proper installation instructions.*
- *Product expansion and contraction is normal and temperature dependent. The overall variance is greater with longer lengths and darker colors. Please take this into account during installation.*
- *We recommend metal stiffeners in all rails for the Homewood series of product.*
- *Make sure that the metal stiffener is in the correct orientation.*
- *Make sure all rails are notched.*
- *Make sure rail ends have at least 1 inch clearance of each other when inserted into posts for 6' lengths, and at least a 1 1/2 inch clearance into posts on 8' length rails. This will allow for adequate expansion and contraction of rails within the posts and prevent bow.*
- *We recommend attaching the U channel trim to the post to help stabilize T&G boards.*
- *Do not use any clear wrapping or shrink wrap on fence for storage or transportation. Make sure any wrap or protection of the fence or profiles does not absorb and retain heat. It will cause warping.*
- *We recommend the use of a midrail to reduce T&G bowing, especially on darker colors.*
- *Do not store or install product next to a heat source.*
- *Be mindful of installing the product near reflective surfaces (E.G. glass windows and doors), which can concentrate sunlight and heat the product.*
- *Be mindful of installing the product on or adjacent to asphalt or similar materials that absorb heat.*
- *As with any other product, scratches will be more evident in darker colors. Use caution when transporting and installing the Homewood series of products.*
- *Do not put dirt or mulch against rails. It could cause rails to permanently bow out.*
- *CAUTION - when dealing with slopes, please make sure that T&G boards are cut to provide adequate clearance inside of the rail. If the T&G board cannot move against the rail, there can be excessive bowing during expansion and contraction. Make sure pickets are cut for adequate clearance.*

# ROUND COLUMN PROFILES

**TD84 (0.170 wall)**  
**8.40" Round Column**  
**Pcs/Box: 1**  
**Boxes/Skid: 10**

Refer to Commodity Sheet for box costs.

# HOMewood® PROFILES

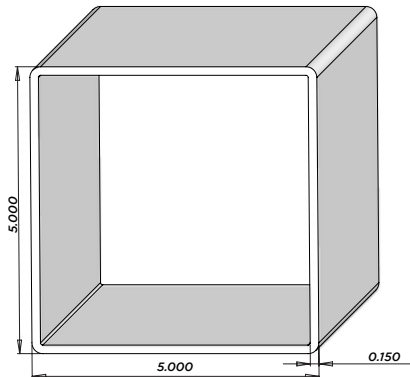

## Homewood Fabrication Guidelines

Homeland Vinyl Products does not warranty bowing of pickets.  
Please make sure of proper installation to reduce all of the factors mentioned.

- Follow proper installation instructions.
- Product expansion and contraction is normal and temperature dependent. The overall variance is greater with longer lengths and darker colors. Please take this into account during installation.
- We recommend metal stiffeners in all rails for the Homewood series of product.
- Make sure that the metal stiffener is in the correct orientation.
- Make sure all rails are notched.
- Make sure rail ends have at least 1 inch clearance of each other when inserted into posts for 6' lengths, and at least a 1 1/2 inch clearance into posts on 8' length rails. This will allow for adequate expansion and contraction of rails within the posts and prevent bow.
- We recommend attaching the U channel trim to the post to help stabilize T&G boards.
- Do not use any clear wrapping or shrink wrap on fence for storage or transportation. Make sure any wrap or protection of the fence or profiles does not absorb and retain heat. It will cause warping.
- We recommend the use of a midrail to reduce T&G bowing, especially on darker colors.
- Do not store or install product next to a heat source.
- Be mindful of installing the product near reflective surfaces (E.G. glass windows and doors), which can concentrate sunlight and heat the product.
- Be mindful of installing the product on or adjacent to asphalt or similar materials that absorb heat.
- As with any other product, scratches will be more evident in darker colors. Use caution when transporting and installing the Homewood series of products.
- Do not put dirt or mulch against rails. It could cause rails to permanently bow out.
- CAUTION - when dealing with slopes, please make sure that T&G boards are cut to provide adequate clearance inside of the rail. If the T&G board cannot move against the rail, there can be excessive bowing during expansion and contraction. Make sure pickets are cut for adequate clearance.
